Professional Summary

Junior Data Engineer & Analytics Engineer with enterprise experience at **GBM (IBM & Google Cloud Premier Partner)** and experience designing a **Medallion Data Lakehouse on Google Cloud Platform (GCP)**. **Google Cloud Certified — Associate Data Practitioner**, fluent in **English (C1 Advanced)**, with experience in decoupled OLTP/OLAP ingestion, **BigQuery, Dataform (SQLX), Datastream CDC, IBM InfoSphere DataStage, IBM DB2 LUW, SQL, and Python**.

Experience

Digital Solutions Specialist Intern (Data & Cloud Engineering), GBM (IBM & Google Cloud Premier Partner) – July 2026 – Oct 2026
San Salvador

- Designed a **client ETL architecture** for near-real-time cloud replication by architecting an end-to-end pipeline on **Google Cloud** (**BigQuery, Dataform, Datastream CDC, Cloud Storage, HA VPN, Cloud Router**) backed by **Lucidchart** data models and **SQL DDL** scripts.
- Delivered **production-ready enterprise ETL jobs** with zero data loss by developing, parameterizing, and backing up complex data pipelines in **IBM InfoSphere DataStage** (Transformers, Lookups, Joins, Merge, Funnel) and configuring **IBM DB2 LUW** database instances on **Linux RHEL**.
- Established **100% auditable cloud governance and FinOps budget validation** across client proposals by co-authoring **GCP security frameworks** (least-privilege **IAM, MFA**, credential rotation, audit logging, end-to-end data lineage) and sizing cloud infrastructure in **Google Cloud Pricing Calculator**.
- Accelerated corporate PDF documentation compilation by **80%** and resolved **24+ Azure DevOps** engineering work items by building a **Python CLI automation tool** under **Spec-Driven Development (SDD)** with **Kiro** and training the team on **Git/SSH** workflows.

Projects

FERROSTATS — Cloud-Native Medallion Data Lakehouse & Streaming Pipeline on GCP Live App | Looker BI

- Designed a **decoupled OLTP-to-OLAP streaming ingestion pipeline** achieving **<50 ms** edge transactional latency and **0% overselling** by specifying strict event schemas, ACID concurrency rules, and UUID idempotency under **Spec-Driven Development (SDD)** to stream transactional events asynchronously into **Google BigQuery Bronze**.
- Architected an automated **Medallion Data Lakehouse (Bronze/Silver/Gold)** in **Google BigQuery** orchestrated with **Google Dataform (SQLX)**, transforming **7 raw immutable ingestion tables** into **3 curated Silver staging models** with automated data quality assertions and **3 Gold Star Schema analytical marts**.
- Automated dynamic **80/20 Pareto ABC inventory segmentation**, Daily Burn Rate, Days of Inventory (DOI), and Reorder Point (ROP) with a **15-day safety buffer** using analytical **BigQuery SQL window functions** across rolling 30-day windows powering a **3-page Looker Studio executive dashboard**.
- Enforced a permanent **$0.00/mo operating cost** (**~$40/mo saved** across **~15,000 req/mo**) by replacing Cloud SQL instances and VPC connectors with scale-to-zero **Cloud Run** containers (**<3 s** cold starts), IAM metadata OAuth tokens, and automated **Artifact Registry** image pruning (**<0.3 GB**).

Skills

Cloud & Data Warehouses: Google Cloud Platform (BigQuery, Dataform SQLX, Datastream CDC, Cloud Storage, Cloud Run, Artifact Registry, Looker Studio, IAM, HA VPN, Cloud Router, FinOps & Pricing Calculator)

Data Modeling & Pipelines: Medallion Architecture (Bronze/Silver/Gold), Star Schema (Fact/Dimension Tables), Data Quality Assertions, ETL/ELT Orchestration, IBM InfoSphere DataStage, Lucidchart

Languages & Frameworks: SQL (GoogleSQL, Window Functions, CTEs, DDL/DML), Python 3.11 (Pandas, NumPy), Bash, PowerShell

Databases & Infrastructure: IBM DB2 LUW, Docker, Linux RHEL, Git/SSH, Azure DevOps, Spec-Driven Development (SDD)

Spoken Languages: Spanish (Native), English (C1 Advanced)

Certifications

Google Cloud Certified — Associate Data Practitioner (ID: 23e3584a246f4c149f26fea03cebcbbb) Oct 2026 – Oct 2029

Google Cloud Skill Badges: Derive Insights from Data | Prepare Data for Looker Dashboards and Reports Aug 2026

EF SET English Certificate — C1 Advanced Aug 2026

Code in Place (Python Programming) — Stanford University 2026

Education

Technical Baccalaureate Diploma in Software Development (3-Year Vocational Technical Program) – Expected Graduation: Dec 2026
Instituto Nacional San Luis

- **Key Curriculum:** Algorithmic Logic, Relational Databases (SQL), Data Structures, Web Architecture & Software Engineering.
